STATEMENT OF RELEVANCY

Reference AA (US 6,384,808) on Form PTO- 1449:

Proposed concept is nearly the same as mine. But it claims not for embedded non-volatile memory technology. Embedded flash memory operation read voltage is much decreasing as CPU frag. is higher. To most this high performance read access, high speed and super low consumption is indispensable for e-flash. It's very important to apply this new level-shifter to e-flash technology.
